Esteban de Jesús Santiago Torres

Software Development · Computer Engineering Student

UTM · 5th semester · GPA 9.0/10 · Oaxaca, Mexico · remote or relocation

Spanish native · English advanced · Chinese and Russian basic

PROFILE

Computer Engineering student with cross-platform mobile development experience (Flutter, in production) and a RISC-V processor designed from scratch in VHDL. Looking for a software development internship in summer 2027.

EDUCATION

2024 – present
Computer Engineering, Universidad Tecnológica de la Mixteca · GPA 9.0/10
Computer Architecture, Data Structures, Compilers, Operating Systems, Databases, Object-Oriented Programming

6 semesters
Theater, Escuela de Iniciación Artística (INBAL)
Actor in "Metamorfosis Teatro"

SKILLS

Languages

Python · Dart · C / C++ · Java · SQL · JavaScript · HTML · CSS · VHDL · x86-64 asm

Frameworks and data

Flutter · PyQt6 · PostgreSQL · SQLite · MongoDB · Docker Compose

Tools

Git · GitHub Actions · Linux · Xilinx ISE · FPGA Spartan-3E · ESP32

Competencies

Object-Oriented Programming · Mobile Development · Cross-platform Apps · Teamwork

SOFTWARE EXPERIENCE

Flutter Developer — Point-of-sale systems · *Freelance* — **Aug. 2026 – present**

- **200 orders in the first week** in production for a café's point-of-sale system, by building it as a cross-platform mobile and desktop app in Flutter (Android, Windows and Linux), with split bills and Bluetooth QR receipts (ESC/POS).
- **Paper notebook retired and 30 customers** in a loyalty program, by implementing cash-register closings, sales statistics and Excel export on a local SQLite database.
- **Zero manual steps** per Windows release, by automating build and code signing with GitHub Actions.

FEATURED TECHNICAL PROJECTS

Single-cycle RISC-V (RV32I) processor — EstebanSantiag0/RISC-VCPU

VHDL, Xilinx ISE 14.7, Spartan-3E FPGA

CPU designed from scratch that runs a subset of RV32I (arithmetic, logic, load/store and conditional branches): 32-bit ALU, 32-register file, control unit, memories and next-PC logic.

Desktop school management system (CRUD) — EstebanSantiag0/CRUD

Python, PyQt6, PostgreSQL, Docker Compose, Matplotlib

Manages students, courses and degree programs on PostgreSQL in Docker, with statistics in pie and bar charts.

Turing machine simulator — Utemitas/DefinedTuringMachinesSimulator

Python, PyQt6, PyInstaller · Teamwork

Two step-by-step Turing machines, distributed as a Windows executable. Team of 8 in Utemitas, a GitHub organization I manage.

Digital design labs on FPGA — EstebanSantiag0

VHDL, Xilinx ISE 14.7 schematics, Digilent Nexys 2

Five documented designs: shift register, 0000–9999 counter, text marquee, 7-segment display multiplexing and PWM.

OTHER EXPERIENCE

3D architectural modeling · *Collaboration with an architect* — **Jan. 2025 – present**

5 projects delivered and the collaboration expanded to renders and social media (Feb. 2026), by modeling their presentations in Blender.

Paletería El Golpe branch · *Own business* — **Summer 2026**

350 popsicles and 20 liters of ice cream sold during the 2026 World Cup, by opening the branch and hiring and coordinating **4 employees**, in charge of inventory, cash and payroll.
